

FAREAL AHMED

Software Engineer

Melbourne, Australia | farealahmed@gmail.com | linkedin.com/in/fareal | github.com/farealahmed

SKILLS

Languages & Frameworks: Java, Kotlin, Spring Boot, JavaScript, TypeScript, React.js, Next.js, Node.js, Express.js

APIs & Integration: RESTful APIs, GraphQL, OpenAPI/Swagger, WebSockets, LangChain4j

Databases: PostgreSQL (pgvector), Microsoft SQL Server, MongoDB, Prisma, Hibernate

Cloud & DevOps: AWS, GCP, Docker, Git, GitLab, CI/CD, Kibana, Grafana

Development Practices: Agile (Scrum), TDD, Clean Architecture, Microservices, RESTful API Design

EXPERIENCE

Software Engineer | Compass Operations Pty Ltd., Melbourne | *June 2022 - September 2025*

- **Built end-to-end full-stack modules for high-traffic school management system** serving users across Australia (timetables, course selections, exams, daily-organisation) using Java, Kotlin, Spring Boot, React, and TypeScript.
- **Engineered scalable backend services** implementing RESTful and GraphQL APIs for high availability. Developed high-performance React/TypeScript UIs with modular, accessible components adhering to enterprise design systems.
- **Re-engineered asynchronous job engine** into hybrid sync/async processor using Factory pattern and Java Suppliers, enabling immediate user actions while maintaining 100% code reuse.
- **Optimized system performance** by designing lean DTOs and efficient data-fetching strategies, reducing page load times from 10 seconds to under 3 seconds.
- **Implemented recursive backtracking algorithm** to resolve 30+ edge cases in data selection, ensuring 100% data integrity. Refactored legacy service layers using Clean Architecture principles, reducing technical debt.
- **Maintained comprehensive test suites (TDD)** and managed CI/CD pipelines in GitLab, ensuring stable releases aligned with academic deadlines.

Technical Trainer | BASIS Institute of Technology & Management, Dhaka | *February 2013 - October 2014*

- Trained 3 cohorts in C#, .NET, OOP, and clean coding practices; developed curriculum based on industry standards.

Software Engineer | ADDIE Soft Ltd., Dhaka, Bangladesh | *August 2011 - January 2013*

- Built core features for Oddhoyon, a school management system used by 1000+ schools in Bangladesh.
- Led migration from desktop (Windows Forms) to ASP.NET MVC, improving scalability and maintainability.

PERSONAL PROJECTS

AI-Powered Document Assistant (RAG Application)

- Built full-stack RAG application enabling users to chat with PDF/DOCX documents using Spring Boot and React. Implemented high-performance backend with LangChain4j for vector embeddings and Apache Tika for parsing, integrated with Ollama for local LLM inference. Built scalable vector search using PostgreSQL with pgvector.

Video Vault

- Built end-to-end video streaming application integrating Spring Boot REST backend with React frontend. Designed PostgreSQL database schema using Docker, implemented secure authentication with Spring Security, and engineered efficient multipart file handling for large video uploads.

EDUCATION

BSc in Computer Science and Engineering

Ahsanullah University of Science and Technology, Dhaka, Bangladesh | *2007 - 2011*
